

MEDICAL STUDENTS BEING TAUGHT AT ACLE MEDICAL CENTRE

If you would like anymore information
please contact the surgery on
01493 717796
or ask at Reception

**Acle Medical Partnership is
pleased to announce that we
have been chosen to teach the
next generation of Doctors and
will be taking part in the training
of Medical Students.**

ACLE MEDICAL CENTRE

If you have any questions
regarding seeing the Medical
students or any other queries
please do not hesitate to ask
a member of staff.

If you are not sure if you
would be suitable to see a
medical student please leave
your query with reception and
they will ask a clinician on
your behalf. Thank you.

Medical Students 2015

We are very pleased to announce that from September 2015 Acle Medical Centre will be taking part in the teaching of Medical students. A group of 10 students in their second year of study will come to the practice on some Fridays throughout the year. The students will be in the surgery seeing patients and gaining knowledge and experience of working in Primary Care.

Seeing Patients

The Medical Students will need to gain experience, seeing and talking to real life patients within a consultation. Each Medical Student is bound by the same confidentiality duty as all other NHS Staff. The students will not discuss your personal details with anyone. They may discuss the things they have learnt with fellow students in their group and medical teachers for educational purposes.

Can you see Medical Students?

We would really appreciate your help with teaching the next generation of doctors. If you have any of the following conditions and are willing to take part please let reception know and we may be in contact.

- Heart Conditions
- Lung Conditions
- Chest Conditions
- Skin Conditions
- Blood Disorders

Each patient will be seen by 2 medical students for around 45 minutes. The whole group is supervised by Dr Yeganeh and Dr Noble. This will not be like a normal consultation as the students will not be able to advise upon or treat your condition.
